FREELANCE GRAPHIC DESIGNER

As a freelancer, I have been working on various graphic design projects. The things I have been creating include: logos, business cards, posters, banners, leaflets, brochures, clothing printing, snowboard deck designs and other.

01.10.2016 - 30.06.2017

JUNIOR WEB DEVELOPER

COMARCH S.A., CRACOW

As a Junior Web Developer, I have continued to develop the functionalities of the system I had worked on as an intern.

TECHNOLOGIES USED:

AngularJS, Bootstrap, SCSS, Jasmine + Karma, Java, Spring, Maven, git, gulp

MY TASKS:

- Development of graphical interface and functionality of one of the applications, that was a part of multilayer internal company system, both on the front-end and the back-end side.
- Creation of the SPA website (with back-end made with Spring) presenting the various authentication protocols and login methods used by the system: SAML, OAuth2.0 WSFederation.
- Creation of the end-user (administrator) documentation for the whole system.

01.07.2016 - 30.09.2016

PROGRAMMING INTERN

COMARCH S.A., CRACOW

As an intern, I have been working on multilayer authentication and authorization system, mainly on the front-end side.

TECHNOLOGIES USED:

AngularJS, Bootstrap, SCSS, Java, Spring, Maven, git

MY TASKS:

- Creation of the SPA website as a system starting page using Bootstrap framework and AngularJS.
- Design and implementation of the administrative dashboard section, that summarized the user activities such as: the most frequently used applications and login statistics in a form of interactive charts (I have used Chart.js library).
- Some minor back-end works using Java and Spring.
